To completely offset our company's carbon emissions, we've donated to OneTreePlanted to plant hundreds of native species plants in New Zealand.

CHOOSING TO HEAT YOUR HOME WITH A PYRO FIRE WILL **REMOVE 10 TONNES OF CO^2 FROM THE ENVIRONMENT**

But what does that mean for you?
The amount of CO^2 your Pyro Fire will emit in its lfetime is completely offset.

Wood is the only renewable fuel in a human lifetime. This makes it an environmentally considerate way to warm your home. Conserving and replacing our natural resources are the heart of true sustainability, allowing us get to the root of the climate issue.
